**Recommendation letter for Hoang Duc Anh Kiet**

It is my great pleasure to recommend Hoang Duc Anh Kiet, to whom I taught Mathematics in AS Level and Further Mathematics in A level. I have known him for almost two years in my capacity as his Mathematics Teacher. Mr. Hoang Duc Anh Kiet is a diligent and ambitious student. He has a consistently strong academic record in my subject. He was always showing interest in learning various methods to solve a single question. He has always wanted to understand the concept in depth even if the concept is beyond the scope of the syllabus.

His innovative thinking and dedication have earned academic laurels. His practicality and adaptability in problem solving sessions have greatly contributed towards attaining academic excellence. He achieved an A grade in AS Level Math, where he learnt all 4 papers of 9709 Math in 1 year – something which normally takes students 2 years to learn. The results for A Level Further Math(9231) is yet to be declared but based on his performance in class assessments, I am predicting an A\* in A Level Further Math.

He is a very bright student who has never once demonstrated a negative attitude. He takes on board the views of students needing greater academic support, while always putting across his own opinion in a calm way. He is always ready to support students with areas of improvement in problem solving.

Kiet is an intelligent, hard-working, sincere, and cheerful student. He is a pleasure to have in the classroom. His positive attitude and self-belief, even in the face of adversity, are immensely admirable assets. As he continues to mature, I am confident that he will continue to demonstrate the same perseverance and optimism that he has shown to myself and his peers over the last two academic years. I highly recommend Hung for admission to your undergraduate program.

Yours sincerely,

**Mr. Ramesh Kumar Singh**
